

THE 12 MATH LABORS OF HERACLES

BY MR. E. MIKE

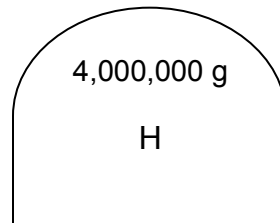

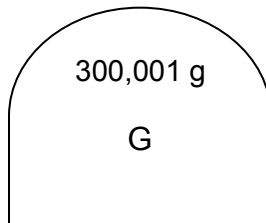

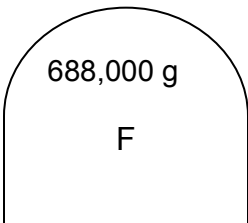

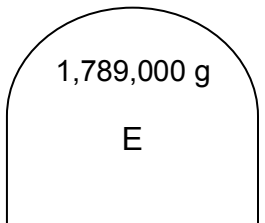

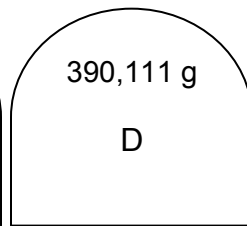

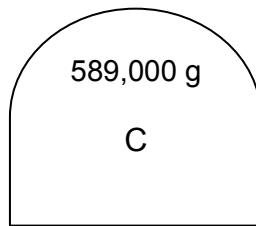

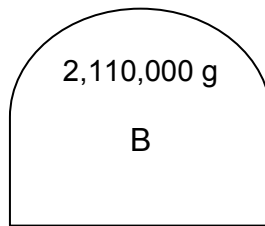

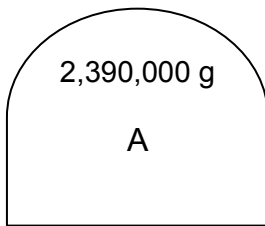

Name _____ Date _____ Period _____

Practice

It was in the city of Ithaca where Heracles was placed in charge of the docks. Sacks of grain would come into port and be unloaded onto carts. Each cart had a maximum capacity of 5000 kg.

Directions: There are two carts. Write the letters of the sacks into the carts so that the combined weight of the sacks is less than or equal to 5000 kg. Try to use as many sacks as possible.
